## 1. Abstract & Vision

TacoToken (TACO) is a community-driven meme token on Binance Smart Chain (BSC) that blends political satire with decentralized governance. Inspired by the viral power of memes, TACO empowers holders to propose and vote on core decisions—creating a lighthearted yet participatory ecosystem. Our vision is to unite humor and blockchain, forging a token that's as fun as it is fair.

## 2. Tokenomics

- **Total Supply:** 92,000,000,000 TACO (18 decimals)
- **Burned at Launch:** 45,000,000,000 TACO
- **Circulating Supply:** 47,000,000,000 TACO
- **Liquidity:** Locked on PancakeSwap until December 11, 2025
- **Allocation:**
  - 100% of supply minted at launch
  - 49% locked for liquidity
  - 51% held in treasury, with 45 billion pre-burned and 6 billion reserved for future community incentives (airdrops, NFTs, marketing)
- **Deflationary Mechanism:** No further mint; community votes may authorize additional burns.

## 3. Governance Model

TACO governance leverages off-chain Snapshot voting with on-chain execution via a multisig treasury:

1. **Proposal Submission:** Any holder with  $\geq 0.1\%$  of circulating supply may submit a proposal on Snapshot.org.
2. **Discussion Period:** 5 days of open debate in the TacoToken Discord/Telegram.
3. **Voting Period:** 3 days; quorum set at 10% of circulating supply.

4. **Execution:** Passed proposals are enacted by the multisig signers within 48 hours.
5. **Treasury Use:** Community grants, marketing, burn events, and ecosystem development—all subject to vote.
