1. Abstract & Vision

TacoToken (TACO) is a community-driven meme token on Binance Smart Chain (BSC) that blends political satire with transparent, tokenized governance. Inspired by viral humor, TACO empowers holders to propose and vote on core decisions—burn events, marketing allocations, ecosystem partnerships—via off-chain Snapshot polling and on-chain multisig execution. Our vision is to unite the power of memes with decentralized decision-making, forging a token that's as fun as it is fair.
